ELEVEN™ Storage and Wax Building

Frank Lloyd Wright's fascination with horizontal and curvilinear forms is what led to his remarkable design for the Johnson Wax building in Racine, Wisconsin. Wright intentionally designed the building low to the ground so as to not interrupt the landscape around it. He used this same principle when designing the furniture in the space. The idea was that the architecture and the furniture were to be inseparable and that they would compliment each other.

Swiss architect, Daniel Korb, was drawn to these ideologies when he designed Eleven. The idea of architecture going uninterrupted in a space quickly became the inspiration behind the whole collection. The smooth, curvilinear lines of the building were translated into the rounded corners of the credenzas and work surfaces creating a seamless, beautiful aesthetic.

“Architecture is that great living creative spirit which from generation to generation, from age to age, proceeds, persists, creates, according to the nature of man, and his circumstances as they change.” -Frank Lloyd Wright

ELEVEN™ COLLABORATIVE SPACE

ELEVEN™ WORK SPACE

We're excited to announce that Eleven™ Work Space is now online! Located under the Products tab you can find all the tools you need to start specifying this new product.

Intermix Height Adjustable Table

“A change of table height can drive new behavior, enhance creativity and promote healthier conversations in the office.”

With office footprints shrinking, there has been an emphasis on dual use space. We've found that some meetings require a sitting height surface for active-work sessions. Other meetings are more effective with a less formal space. Lowering the physical barriers between you and your colleagues immediately changes the energy of the space. Meeting at a magazine height table vs. a desk height table offers up a more social and collaborative feel. Feelings of hierarchy are typically reduced and people are more willing to offer up new ideas.

The **Intermix Height Adjustable Table** was focused around how to deliver both of these functions into one space. It delivers desk height when you need the active work support and adjusts down to magazine height with the flip of a button.

Packing in 12" of travel in a 17.5" tall table makes this range of motion very unique. This table is the the only one in its class ranging from desk height to magazine.

Madrid + Interior Design Magazine

The Madrid lounge chair from OFS was recently featured on Interior Design Magazine's [website](#) in the new products section. This is one of the most visited sections of their website because it highlights all of the latest and greatest products in the interior design industry. Great exposure for a great chair!

In the Press

3 Rings, a blog devoted to uncovering and sharing the latest and greatest products in architecture and design, recently put a spotlight on Intermix by First Office. They did a great job highlighting the benefits of this fun and flexible line of products. [Click here](#) to read more about what's making Intermix such a sought after collection.

STAKS Revit Symbols

STAKS Revit symbols are now online and available for [download](#).

STAKS Assembly Videos

New STAKS assembly videos have just been added online. These 40 second clips give quick tutorials on the basics of assembling STAKS. These videos can be found on the [STAKS website](#) or on [ofsbrands.com Media Library](#).

the Edge wins Good Design Award

the Edge, designed by Primo Orpilla and Verda Alexander of Studio O+A in San Francisco, recently won a GOOD DESIGN Award for excellence in furniture design. These awards are presented by The Chicago Athenaeum: Museum of Architecture and Design along with The European Centre for Architecture Art Design and Urban Studies. The awards are based on a full spectrum of product design from all around the world.
